

Mikhail Savushkin

AI Solutions Integrator | Backend & Automation Engineer

Istanbul, Türkiye | savushkinwork@gmail.com | [linkedin.com/in/mikhail-savushkin-993a33408](https://www.linkedin.com/in/mikhail-savushkin-993a33408)

Backend and Automation Engineer with a Data Science background. I build AI-driven systems, integrate LLM APIs, and automate routine business processes. One year as a Data Scientist at Yandex anchors the work: data pipelines, analytical models, and business-facing systems thinking.

Proof

- 1 year at Yandex - production data work, pipelines, analytical models, and cross-functional delivery.
- Python, Node.js, AWS - backend foundations for APIs, automation, and cloud-connected systems.
- AI agents and automation - LLM workflows connected to real business processes through webhooks and CRMs.

Selected Systems

AI reviewer for WhatsApp sales conversations

- Connected messaging data to an LLM-backed QA flow that reviews conversations and extracts sales signals.
- Turns unstructured chats into audit-ready feedback for managers and sales quality review.
- Stack: LLM APIs, webhooks, WhatsApp workflows, QA logic.

Production data pipelines at Yandex

- Built and maintained cleaning pipelines for large datasets.
- Shaped analytical outputs into signals that business teams could use.
- Stack: Python, Pandas, SQL, data visualization.

CRM and sales workflow requirements

- Translated hands-on sales and CRM context into clearer requirements for AI assistants and QA bots.
- Bridged operator workflows with backend and AI system design.

Experience

Backend Engineer (AI & Automation)

International Plus / Power International - Istanbul | May 2026 - Present

- Architected and implemented an AI-driven QA agent for WhatsApp sales.
- Integrated LLMs with messaging platforms via webhooks to automate sales analysis and reduce manual auditing time.

Medical Advisor

International Plus - Istanbul | Dec 2025 - May 2026

- Managed CRM workflows and client interactions across live sales processes.
- Turned operational knowledge into sharper requirements for AI-driven QA bots and automation.

Data Scientist

Yandex - Moscow | Sep 2022 - Sep 2023

- Built and maintained data pipelines for cleaning large-scale datasets.
- Developed analytical models that surfaced insights for business decisions.
- Partnered cross-functionally to translate requirements into data solutions.

Core Stack

Python, Node.js, LLM APIs, AI agents, AWS, Pandas, SQL, Data visualization, Data pipelines, REST APIs, Webhooks, Workflow automation

Education

Istanbul Topkapi University - B.Eng., Computer Engineering, Oct 2023 - Aug 2028 (in progress).
